

YOUR SPECIALIST PARTNER FOR

# Mental Health

**At Britplas, our purpose is to improve life experience through the built environment.**

Over the past two decades, we have developed a comprehensive understanding of the challenges and requirements associated with designing and installing specialist products for mental health facilities.

By working closely with clinicians, architects, contractors and estates professionals, we develop products which are genuinely best in class and which are widely relied upon to help provide optimally safe, secure and therapeutic environments for service users.

# Our product range

The Britplas product range has been designed and continuously developed over many years, working in partnership with NHS trusts, specialist architects and other key stakeholders.

The importance of the physical environment as an aid to recovery is widely acknowledged and we view safety and robustness along with effective therapy as integrated concepts which must both be carefully addressed in the process of product design.

## FENCING

Fortress 80 Fencing is a reliable, low impact perimeter security fencing system which can be overprinted with artwork of your choice to enhance outdoor areas.

## CLIMB-GUARD

Fortress Climb-Guard is a curved aluminium profile which can be fitted to low roof pitches and wall areas to prevent people from climbing onto them and absconding or injuring themselves.

## DOORS

Our robust aluminium external doors are specially adapted for mental health facilities, including anti-ligature hardware.

Our market-leading Safevent® window is widely specified by the NHS and private healthcare groups for its safety, robustness and ability to provide fresh air and natural light as well as a good level of service user control.

## WINDOWS

Our full window range encompasses:

### SAFEVENT®

Our most advanced anti-ligature window for mental health environments.

### SAFEVENT® ELECTRIC

Our most advanced anti-ligature window with electric controls.

### SAFEVENT® VERTICAL

Our most advanced anti-ligature window in a vertically sliding format.

### SAFEVENT® EHA

An enhanced spec window designed for high acuity settings.

### SAFEVENT® FIXED

A secure non-operable window designed for robustness.

### SAFEVENT® FIXED (SECLUSION)

A secure non-operable window and secondary glazing system designed for confinement and isolation rooms.

### INTAVENT

A robust window with enhanced safety and security features above standard casement windows typically used in supervised or common areas of secure environments.
