

Interactive Sensory Projectors

Introducing Omi Interactive

Our collection of interactive projector systems is specially designed for sensory play. They're inclusive, immersive and imaginative and can transform any floor, wall, ceiling or tabletop into a stimulating interactive environment.

Key Features

Movement-Based Technology

omiProjectors track movement, motivating users to get active. Hands, arms, legs, feet and wheelchairs are all picked up by the projector, encouraging the development of proprioceptive, motor, and hand-eye coordination skills.

Dynamic User Control

Choose your projection surface, games, menus, speed and response settings from a handy central panel for a perfectly personalised sensory experience.

300+ Customisable Apps

omiVistas come pre-loaded with an activity hub of over 300 stimulating, developmental and therapeutic games.

From calming nature activities to exciting physical challenges, bright colours, sounds, and ideas will boost wellbeing and social play.

Supports Wellbeing

Getting active with the projector helps users naturally regulate their mood, anxiety, and stress. Not only are the games and activities lots of fun, but they're also great for improving wellbeing.

Interactive Projection omiVista Install

Create inclusive, immersive & interactive worlds with our unique omiVista Projector technology. Use your hands, arms, legs and wheelchairs to get stuck in!

omiVista Install systems are fixed into ceilings and project down onto the space below them. This neat installation unit is perfect for designated **sensory rooms**, **hospitals** and **schools** as it sits flush tiled ceilings, safe and out of the way.

Why should I choose the omiVista Install?

Safe & Protected

omiVista Installs are fixed onto ceilings or ceiling tiles, so the projector is safely and snugly housed away from the action.

Out Of The Way

Install units don't take up any floor space, making them ideal for dynamic environments and active sensory areas.

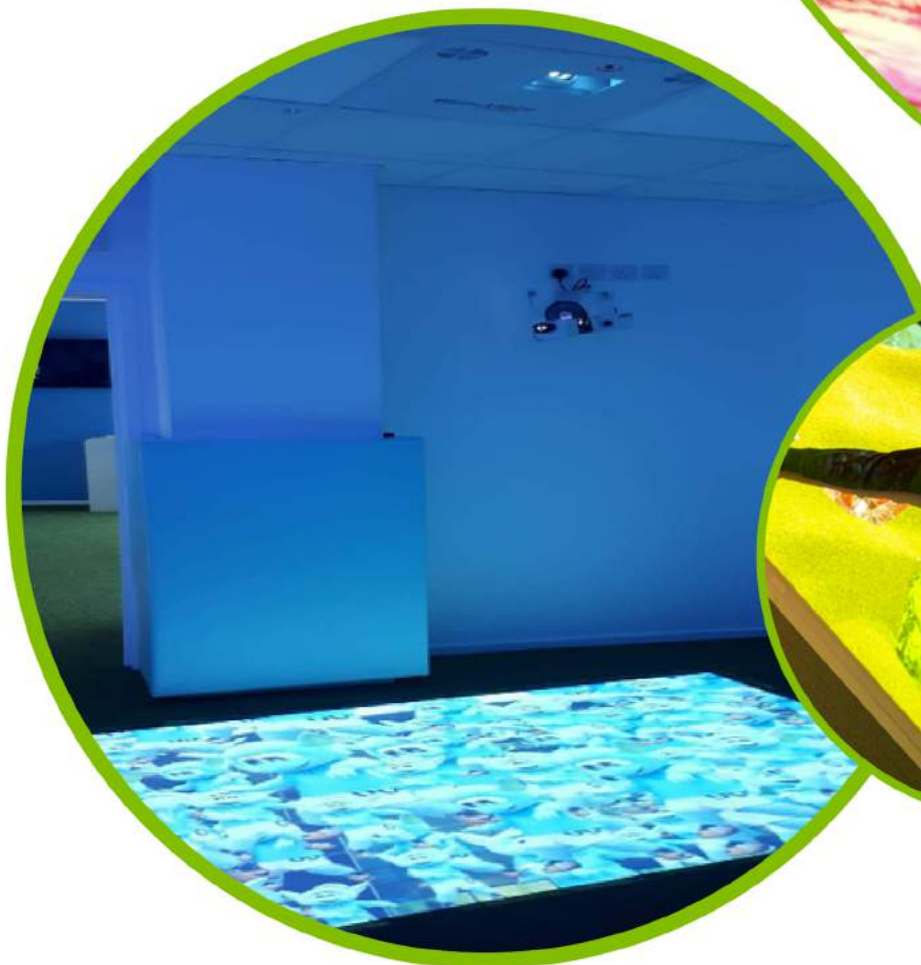

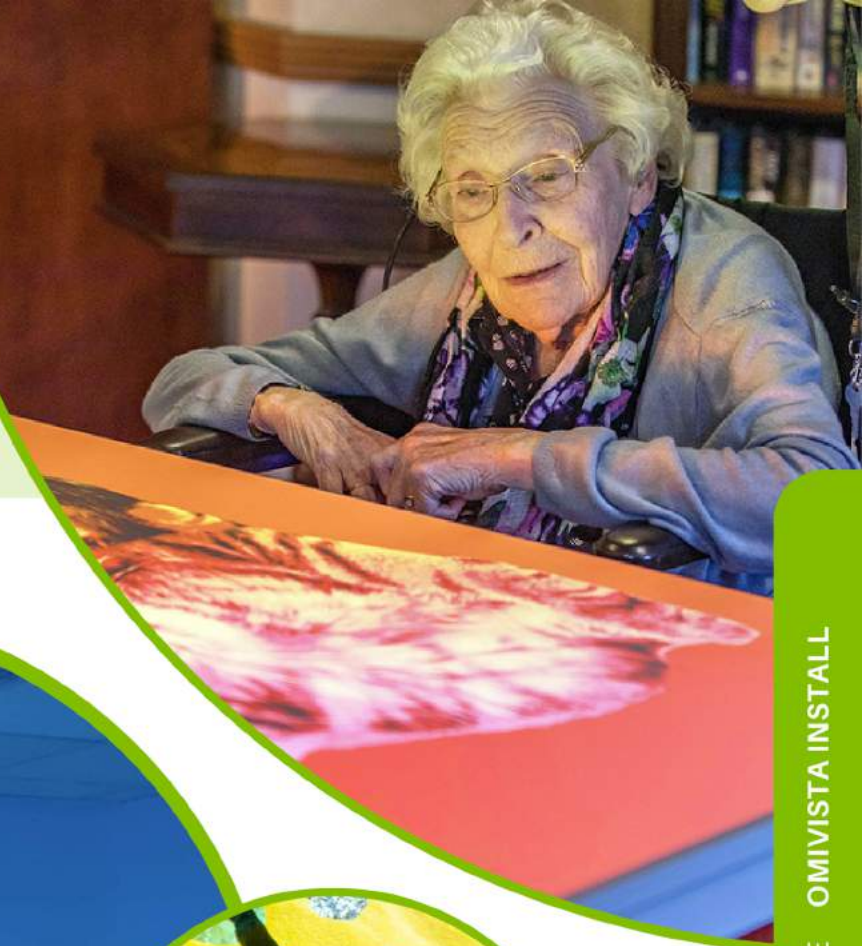

Dynamic & Adaptable

All you need is a flat surface to instantly create interactive sensory fun, whether that's a simple white mat on the floor or a table placed under the projector.

Benefits

- Accessible & inclusive of those with limited movement
- Interactive therapy
- Develop cause & effect skills
- Builds gross motor and proprioceptive skills
- Motivates physical activity
- Inspires imaginations

omiVista+ Install

As above, but the Install+ comes with the highly creative omi content studio, which allows you to design and create your own unique apps & games.

03006

Interactive Projection

omiVista Mobii

Bring the power of play wherever you go with the portable and practical omiVista Mobii.

With a compact design and four sturdy wheels its easy to move this projector from space to space, creating immersive sensory worlds.

It's practicality and portability make it the perfect sensory companion for **schools**, **hospitals** and **care homes**.

Why should I choose the omiVista Mobii?

Height Adjustable

Adjust the height of the projector to complement your play space, whether that's a floor, tabletop or bed.

Portable Play

Share the sensory magic by wheeling the Mobii from space to space, creating interactive worlds wherever you go.

Easy To Store

Its compact size means the Mobii is easy to pack up and put away after a stimulating sensory play session.

Features

- Interactive & dynamic projection
- Sensory content suite with 300+ games & apps
- Remote control & MSE App compatible

Benefits

- Coordination & motor skill development
- Exercise & posture
- Communication & social skills
- Inclusive & accessible interaction
- Cause & effect skills
- Therapeutic calming activities

omiVista Mobii

Self-contained and portable.

The omiVista Mobii can be wheeled from space to space and height adjusted to project clearly on any flat surface. Includes activity suite, remote & handover training.

Interactive Projection omiBudii

Affordable, portable, interactive projector fun!

omiBudii is our budget-friendly interactive projector. Like a compact version of the hugely popular omiMobii, the Budii instantly creates interactive spaces for people to engage with, develop their senses, and have lots of fun.

Its smaller size makes it ideal for spaces that might not have floor or wall space available for play.

Why should I choose the omiBudii?

Budget Friendly

Budii is our entry-level projector, it's cute, compact and just as powerful as the rest of our omi collection.

Play Anywhere

The Budii projector can be mounted to a wall or a Sensory Voyager, for portable, interactive sensory fun!

Easy To Use

A handy tactile remote makes using the Budii simple. With big buttons, it's easy to create a personalised sensory experience.

Benefits

- Coordination & motor skill development
- Mindfulness & wellbeing
- Communication & social skills
- Cause & effect skills
- Therapeutic calming activities
- Inclusive & accessible interaction

Features

- Inclusive design for people of all ages & abilities
- Sensory content suite with 120 games & activities
- Easy to install & set up

omiBudii

Our compact, budget friendly interactive projector transforms flat surfaces into sensory playgrounds. Includes an accessible app suite with 120 games & activities.

O3019L-1

Interactive Projection omiReflex Install

Transform the walls of your sensory space into interactive playgrounds with our extraordinary omiReflex projectors.

Simply plug them in, turn them on, and watch as a magical mirror image pops up on your wall. Watch yourself and a whole host of bright and dynamic images as they dance, pop and change along with your movements.

We'd recommend our omiReflex Install systems for **Schools**, **Nurseries**, **Social Centers** and **Care Homes**.

Why should I choose the omiReflex Install?

Centre Stage

The omiReflex magically transports you into a world of sensory for a highly immersive experience.

Out Of The Way

Install units don't take up any floor space, making them ideal for dynamic environments and active sensory areas.

Motivate Movement

Sensory integration specialists have found that omiReflex projectors can motivate and encourage users to participate in therapeutic physical activities.

Benefits

- Accessible & inclusive of those with limited movement
- Interactive therapy
- Develop cause & effect skills
- Builds gross motor and proprioceptive skills
- Motivates physical activity
- Inspires imaginations

omiReflex Install

omiReflex creates magical mirror images of users as they interact with the immersive worlds around them. Includes activity app suite, remote & handover training.

03006L

omiReflex+ Install

As above, but the Install+ comes with the highly creative omi content studio, which allows you to design and create your own unique apps & games.

It's practicality and portability make it the perfect sensory companion for **schools**, **hospitals** and **care homes**.

Why should I choose the omiReflex Mobii?

Centre Stage

The omiReflex magically transports you into a world of sensory for a highly immersive experience.

Portable Play

Share the sensory magic by wheeling the Mobii from space to space, creating interactive worlds wherever you go.

Easy To Store

Its compact size means the Mobii is easy to pack up and put away after a stimulating sensory play session.

omiReflex Mobii

A portable, self-contained system perfect for sharing and quickly creating immersive interactive sensory areas. Includes activity suite, remote & handover training.

O3019L

omiReflex+ Mobii

Identical to the Mobii, except the Mobii+ also comes with the highly creative omi content studio, allowing you to design and create your own unique apps & games.

O3019

Features

- Interactive & dynamic wall projection
- Creates a magical mirror image of the user, immersing them in games & activities
- omiReflex Mobii Suite with 100+ sensory apps
- Self contained portable unit

Benefits

- Coordination & motor skill development
- Proprioceptive & vestibular feedback
- Communication & social skills
- Inclusive & accessible interaction
- Cause & effect skills
- Exercise & posture

Interactive Projection omiSky

Inclusive play that's accessible for all.

Make yourself comfortable, lie back or sit under the ceiling projector, and look up to find your magical mirror image reflected amongst a whole host of interactive games and activities.

omiSky is ideal for **care environments, hospitals** and **therapeutic spaces.**

Why should I choose the omiSky?

Centre Stage

The omiSky magically transports you into a world of sensory for a highly immersive experience.

Out Of The Way

omiSky sits up high on walls and doesn't take up any floor space, making them ideal for dynamic sensory areas.

Inclusive Play

Designed for everyone, you can interact and play with omiSky with the most limited of movements - a simple nod of the head is enough.

Features

- Inclusive design & dynamic ceiling projection
- Creates a magical mirror image of the user, immersing them in activities & games
- Remote control & MSE app compatible
- omiSky Suite with 100+ apps

Benefits

- Accessible & inclusive for those with limited movement
- Interactive therapy
- Develop cause & effect skills
- Therapeutic calming activities
- Coordination & motor skills

omiSky Install

A ceiling-mounted projector with a dual-camera system that creates magical mirror images across ceilings. Ideal for therapeutic spaces and healthcare environments.

O3024L

omiSky+ Install

Also includes the highly creative omi content studio.
