ANCILLARY EQUIPMENT

Network II Nurse call System – ancillary equipment

Airlert Pneumatic Pad Bed Egress Detector

Kit comprises of:

- Full length air mattress – 1800mm x 500mm
- Adaptor box
- Connection lead to nurse call point

Typical fitting diagram

Part number NET2APM

Points to note:

- Compatible with our *Network II* range of call points.
- Placed between the bed base/frame and the mattress
- Suitable for use on beds with active mattresses and adjustable bases
- Provides detection along the length of the bed
- Long life battery in the adaptor box
- A standard NET206 push-to-call lead can be plugged into the adaptor box

Bed Pressure Mat

Kit comprises of:

- Bed pressure mat – 770mm x 390mm
- Adaptor box
- Connection lead to nurse call point

Typical fitting diagram

Part number NET2BPM

Points to note:

- Compatible with our *Network II* range of call points.
- Placed between the mattress and bed sheet
- Egress from the bed – reduction in pressure – will activate the *Network II* call point
- A standard NET206 push-to-call lead can be plugged into the adaptor box

Chair Pressure Mat

Kit comprises of:

- Chair pressure mat – 380mm x 300mm
- Adaptor box
- Connection lead to nurse call point

Typical fitting diagram

Part number NET2CPM

Points to note:

- Compatible with our *Network II* range of call points.
- Place pressure mat on chair cushion
- Egress from the chair – reduction in pressure – will activate the *Network II* call point
- A standard NET206 push-to-call lead can be plugged into the adaptor box

Floor pressure mat – heavy duty

Kit comprises of:

- Heavy duty floor mat – 900mm x 600mm
- Adaptor box
- Anti-slip mat

Typical fitting diagram

Part number NET2FPM

Points to note:

- Compatible with our *Network II* range of call points.
- Can be placed at the side of beds to detect egress.
- Pressure on the mat will activate the Network 11 call point.
- A standard NET206 push-to call lead can be plugged into the adaptor box

Network II Nurse call System – ancillary equipment

Floor Standing PIR motion detector for bed egress detection

Kit comprises of:

- Floor standing PIR motion detector
- Adaptor box
- Connection lead to nurse call point
- Plug-in power supply unit

Typical fitting diagram

Part number NET2FSPIR

Points to note:

- Compatible with our *Network II* range of call points.
- Low level detection cover designed to reduce false alarms.
- Usually placed at the head of the bed, positioned to detect egress from one side
- A standard NET206 push-to-call lead can be plugged into the adaptor box
