

An introduction to

britplas

Britplas is a leading UK contractor specialising in commercial glazing and façades with a product portfolio that includes windows, curtain walling, cladding, door systems and security fencing.

Operating across the UK and internationally from our North West base, we work with main contractors, architects and clients to design, install and manufacture high quality glazing systems, including award-winning specialist proprietary products and standard systems.

END-TO-END SERVICE

Britplas offers a genuine end-to-end service to support you with all stages of your project - from pre-construction to a cutting edge in-house design department with full BIM capability through to fabrication and installation via our own site teams.

INTELLIGENT FENESTRATION

At Britplas we seek to add value to every stage of your project and bring genuine innovation and improvement to every job we take on.

Engage with us early and we will work with you to find the best product solution, engineer the optimum design, create the most efficient installation program and ensure the best ongoing performance of your building.

INVENTORS AND INNOVATORS

Britplas is the creator of the award-winning Safevent window. Originally designed over 10 years ago to provide a safe and secure operable window for mental health environments, the product has gone on to become the benchmark fenestration product for the sector. Still designed, manufactured and installed by Britplas, we have provided tens of thousands of windows to specialist facilities both throughout the UK and internationally.

ENGINEERED FAÇADES

Working with leading systems suppliers Schüco, Aluprof, Kawneer and Smart Architectural Aluminium, we design, manufacture and install a variety of standard and bespoke glazed façades for a range of projects across the general commercial sector.

Balancing the technical and aesthetic requirements of your project, we will work closely with you from pre-construction stage to develop an optimum solution, considering issues of design engineering, constructability, budget, procurement and programming.
